Newsletter November, 2013

Dear **::VOORNAAM::**,

MER-Europe exhibits at the MEDICA/ COMPAMED trade fair – Nov. 20-22 2013

 <p>Manufacturers Representatives Technical link Engineering Solutions & Support www.mer-europe.com E: info@mer-europe.com</p>	 <p>COMPAMED</p>	<p>Visit Our Stand at the COMPAMED Show in Dusseldorf, Germany, 20-22 November 2013 Hall 8B Stand K09</p>
<p>Excellence Through Innovative Ideas & Practical Solutions</p> <p>Inspection & Production Equipment for the Balloon Catheter and Stent Industry</p>  <p>MPT Europe Medical Production Technology</p>	 <p>A Single Source for Stainless Steel Tubing</p> <p>Stock and custom made stainless steel tubing for engineers, designers and producers of medical devices.</p>	<p>Complete Medical Component and Device Manufacturing</p> <p>Precision machining, turning and milling, High velocity machining, Micromachining, Wire and plunge EDM and more.</p>  <p>SSF specially silicone fabricators</p> <p>Bringing Silicone to Life*</p> <p>Custom Silicone Extrusion, Molding, Sheetting, Dipping & Assembly</p>

News

12-11-2013 | Kevin Shutes, K-Tube Technologies

Medical

K-Tube Direct- is a program that allows you to select sizes of metal tubing that are in stock and which can be shipped to you in a few days [read more](#)

12-11-2013 | John Gray, SSF Europe

Engineering

SSF - Silicone Drains for wound drainage applications. Using their innovative GEOTrans process SSF can produce high quality and cost effective wound drains [read more](#)

12-11-2013 | Tobias Rokosch, CMI

Resources

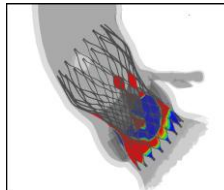

CMI -Contract Manufacturing International is a Contract Developer and OEM Partner with great experience in Catheter based Delivery products [read more](#)

12-11-2013 | Jurgen de Vries, MPT-Europe

Europe

MPT-Europe - Cost effective manual balloon pleating and folding. For small and even larger batches manual pleating and wrapping can be a cost efficient and [read more](#)

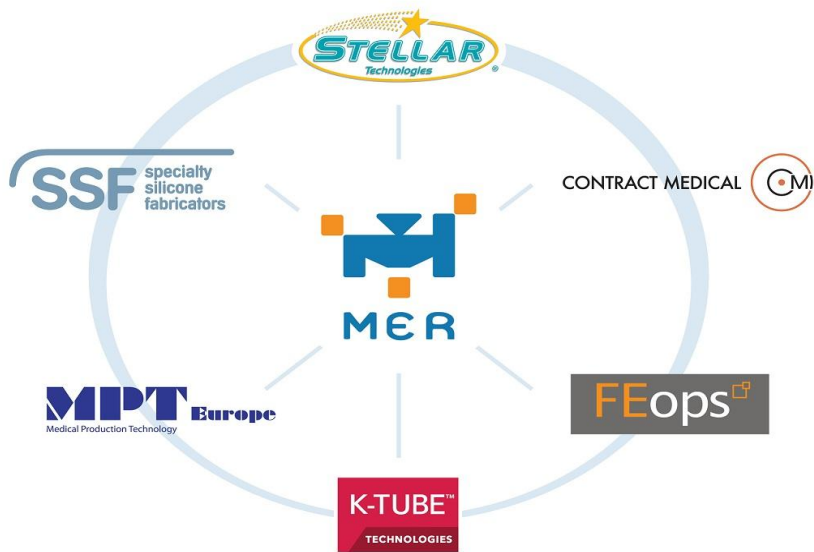

12-11-2013 | Peter Mortier, MER-Europe

FEops -Better Healthcare through simulations

FEops strives to develop realistic simulation technologies for transcatheter Cardiovascular Devices and to bring these from bench to bed! [read more](#)
