MER-Europe (Medical Engineering Resources) is a technically focused sales representative that provides engineering solutions, innovative ideas, commitment and reliability for the Medical Device Industry. Our focus is to work closely with customers to identify their exact requirements and provide a technical link to the medical manufacturers we represent. MER strives in providing a wide array of capabilities that are both practical and competitive, and one point of contact with continuous support for all your engineering needs.

MER represents:

- **Ascend Medical** - Nylon thin wall heatshrink tubing
- **Contract Medical Int.** – Catheter/ Balloon Design & Manufacturing (Full OEM)
- **K-Tube Technologies** - Miniature Stainless Steel Tubing. From the source, different alloys & many stock items
- **MPT Europe** – Sophisticated Inspection and Production Equipment for the Balloon Catheter & Stent industry.
- **Specialty Silicone Fabricators** – Custom Silicone Extrusion, Molding, Sheetting & Combination Products
- **Stellar Technologies** – Precision Machined Components in Precious Metals
