K-TUBE designs and manufactures stainless steel tubing for engineers, designers and producers of medical devices. We can help you with stock or custom tubing in small batches or high-volume runs.

K-TUBE is the largest producer of miniature stainless steel tubing in the United States and the only manufacturer to offer stock and custom tubing direct from the source. Our tubing solutions for the medical market have ranged from traditional dental needles to hypotubes that are used in small-diameter delivery systems. But K-Tube has the ability to manufacture stainless steel tubing for any need you have.

A Single Source For Stainless Tubing

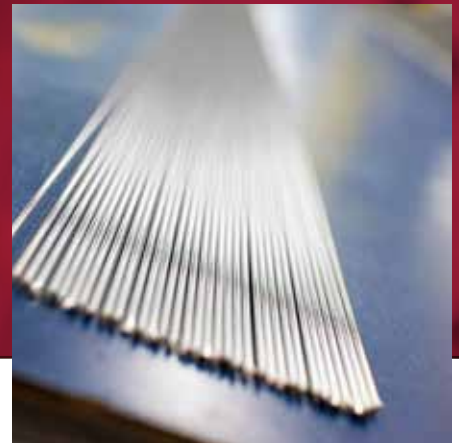

Tubing Made the Way You Want It

Ordering from the source gives you access to metallurgists, engineers and QC experts who can help you select specifications from size and alloy to cut, cleaning and mechanical properties. And every order is fully traceable and comes with raw material certifications, so you can be sure that you're getting exactly what you need.

After 30 years in the industry, we know that consistent quality matters. When you're in the medical device market, you have to be confident that what you're delivering is of the highest quality, every time.

**DISCOVER.DESIGN.
DIRECT.** FROM THE SOURCE

K-TUBE can provide a high level of engineering support throughout the entire life cycle of your device – from idea to full-scale production. With our Direct, Design and Discover programs you can order stock tubing online, arrange for custom manufacturing and create state-of-the-art engineered tubing.

DIRECT

When your new product requires tubing, you can explore your options quickly online. With K-Tube Direct, you don't need to request a quote or even have an account with us. Just order what you need online, and you'll get it overnight, direct from the source.

- Stock tubing options to fit your needs
- Low minimum orders
- Same day shipping and raw-material certifications

DISCOVER

If you're in the early stages of design and need to explore the capabilities of stainless steel tubing, our Discover team can help you get the most out of your idea. They will work with you so your product performs the way you want it to.

- Collaborate with experts in engineering, quality control and metallurgy
- Explore new alloy options to enhance your design
- Benefit from quick-turnaround manufacturing for early-stage prototypes

DESIGN

If your highly specialized applications require custom tubing, you can trust K-Tube to manufacture exactly what you need. With K-Tube Design, you can be sure your order will be made well and to your exact specifications.

- Tubing manufactured to meet your unique needs
- Total material and supply chain traceability
- Quality assurance program for consistency
