## Schivo's commitment during COVID-19

During this time of unprecedented uncertainty, all of us here at Schivo are concerned about the safety and well-being of our families, colleagues, customers, and many partners. Supporting our employees and our customers are key priorities, and our teams are hard at work to avoid disruptions from the COVID-19 virus while at the same time acting responsibly to do what we can to prevent further spread.

We have put in place measures to allow us to continue to meet our commitments to our customers, many of whose requirements will be of greater importance in the current environment, while reducing health risks to our employees and ensuring their safety. Any products used in the treatment of COVID-19 are given full priority.

We have fully implemented recommended social distancing measures across our manufacturing and support teams and have taken additional measures to protect these employees including increased cleaning and disinfection, daily deep cleaning of communal areas, split breaks and screening and restricted access for visitors. We have asked our employees to work at home where possible to reduce transmission risks and to keep them safe. Internal and external events have been rescheduled virtually, postponed or cancelled. We continue to operate at full productivity and will notify our customers of any changes to this.

We have restricted all company travel and all non-essential site visitors.

We continue to monitor daily what health authorities in Ireland and overseas are recommending and will act accordingly in a proportionate way to continue to protect our employees and support our customers.

If you have any questions regarding product supply please contact your representative in Schivo.
